

Ava is a digital health company with the aim to revolutionize women's health. The company is headquartered in Zurich, Switzerland with offices in San Francisco and Hong Kong and partner offices in Belgrade and Makati. Our wearable device, smart app and proprietary predictive algorithms empower women by giving them unique clinically researched insights and personalized data about their menstrual cycle, fertile window, and pregnancy. All delivered in a way that's convenient and non-invasive. Ava is a global, award-winning brand with strong social network communities. Our current key markets include USA, Canada, Germany, Switzerland, Spain, UK, and Hong Kong.

Would you like to join us on our challenging adventure? To strengthen our team, we are looking for a flexible, communicative and project-driven individual who can take on the role of Product Owner or Requirements Analyst depending on each project's context and progress. Either way, you will represent the link between the Product Manager and the Development Team and ensure smooth development of Ava's future product offerings.

## Product Owner / Requirements Analyst (80-100%)

Location: Zurich, Switzerland or Belgrade, Serbia with frequent travel to Belgrade/Zurich and occasional additional travel (about 30% in total)

### **Responsibilities:**

#### ***As a Product Owner:***

- Convey the product vision to the scrum team in collaboration with the Product Manager
- Prioritize Product Backlog, align priorities and scope of product with stakeholders
- Ensure user stories are ready to implement before sprint planning (according to the DoR)
- Define sprint goals with the Development Team
- Accept / reject the implementation of the user stories according to acceptance criteria
- Act as single point of contact for Development Team during sprints for resolving and clarifying issues during development.
- Cooperate closely with internal technical experts, including data scientists, developers, architects, and testers
- Collaborate with Scrum Master to facilitate agile practices: daily stand-ups, grooming meetings, planning meetings, retrospectives, demos

#### ***As a Requirements Analyst:***

- In close collaboration with the Product Manager and other internal stakeholders, clarify the purpose and intention of the planned software increment and analyze the technical implications
- Structure the (functional and nonfunctional) software requirements into levels of different granularity down to the granularity that allows the software requirements to be implemented by software development
- Ensure that the software requirements are clear, complete, distinct and without contradictions
- Identify edge cases and actively drive the conversation how they are handled
- Ensure the vertical traceability from the product requirements down to the most detailed level
- Document the software requirements according to company's requirement management guidelines
- Collaborate closely with the Test Manager and QA to ensure that fulfillment of requirements is documented in a compliant manner.
- Manage changes to software requirements according to company's change management guidelines
- Supports the Risks Management regarding criticality rating of requirements

#### About you:

- Degree from a renowned technical university (computer science, engineering, other)
- Ideally CPRE foundation or advanced level, Certified Product Owner or similar certification
- 2+ years' experience as a Scrum Product Owner or Requirements Analyst
- Background in software development
- Strong analytical and problem-solving skills, including a thorough understanding of how to interpret customer and business needs and translate them into practical applications and operational solutions
- Comprehensive understanding of common architectures and technologies
- Good understanding of software development processes and life cycle management – prior experience of development in a regulated industry is a big plus
- Excellent interpersonal and communication skills with track record of coordinating and communicating with different stakeholders (Data Science, Marketing, Software Development, Hardware)
- High standard of personal organization and good project management skills
- Demonstrated ability to balance user needs with business priorities and manage multiple competing priorities simultaneously and under pressure to completion
- High self-motivation and drive to develop and implement new products efficiently
- Enjoying a startup culture and being able to cope with uncertainty
- Fluent in English; German, Serbian and other languages are a plus
- Willingness to travel (about 30%)
- Swiss or EU/EFTA work permit if located in Zurich

Would you like to contribute to a highly motivated team, with a lot of space for your own initiatives? If yes, please apply online or send your complete application to [recruiting@avawomen.com](mailto:recruiting@avawomen.com).

We appreciate that you share our excitement for Ava. Please be aware that only fully documented applications (CV, motivation letter and supporting documents) can be considered.

#### Ava – Revolutionizing women's health

Philipp Tholen, VP Product & Software Engineering

*Should you not hear back from us within 3 weeks your application has unfortunately not been successful for the respective role.*
