

Ava is a digital health company with the aim to revolutionize women's health. The company is headquartered in Zurich, Switzerland with offices in San Francisco and Hong Kong and partner offices in Belgrade and Makati. Our wearable device, smart app and proprietary predictive algorithms empower women by giving them unique clinically researched insights and personalized data about their menstrual cycle, fertile window, and pregnancy delivered in a way that's convenient and non-invasive. Ava is a global, award-winning brand with strong social network communities. Our current key markets include USA, Canada, Germany, Switzerland, Spain, UK, and Hong Kong.

Would you like to join us on our challenging adventure? For our local partner in Belgrade, **Holycode D.O.O**, who employs our software engineering team, we are looking for a:

Platform/Team Lead QA

Location: Belgrade with regular travel to our office in Zurich, Switzerland

Responsibilities:

- Be the technical lead for our QA team and coordinate testing activities with Engineering Manager, Software Architect and Product Managers.
- Understand and review software requirements, identify potential issues and contribute to required documentation.
- Together with team provide the detailed test plans.
- Discuss and decide on QA setup and detailed design together with the software development team and Software Architect.
- Track team progress, resolve and escalate issues if needed and ensure timely delivery of all features.
- Do code reviews, support the automation testing team during implementation with active contribution to code if required and ensure unified development standards.
- Plan releases together with project team and DevOps Engineer and make sure that our applications are stable, secure and scalable.
- Ensure that Ava's Quality Management System is embraced by the QA team and advocate for best engineering practices.
- Manage the QA team, including vacation planning in line with the product and release roadmap and the remainder of the software development team
- Ensure continuous personal and professional growth of team members, give feedback and do performance reviews

About you:

- Bachelor's or Master's degree in computer science, electrical engineering or a related field.
- +5 years' working experience as a professional software tester.
- +3 years' working experience as a professional software automation tester.
- Broad technical understanding and hands-on experience in at least 2 of the following technologies: Java, Appium, Cucumber, Firebase, REST APIs, Jenkins.
- ISTQB certified.
- Good understanding of software development lifecycles in a regulated industry, experience in medical device software development, and knowledge of relevant norms and guidelines (IEC 62304) is a big plus.
- +2 years of experience in managing a team of at least 4 people with proven track record of mentoring and coaching team members

- Willingness to work flexibly, in an interdisciplinary and international environment, depending on the current project status
- Strong analytical skills and process-oriented work style with a structured, independent approach to work and focus on getting things done
- Excellent written and verbal communication skills with the ability to adjust to the audience
- Stress-resistant, even in fast-paced and busy situations
- Fluency in English (German and other European languages are a plus) and willingness to travel (up to 30%)

Would you like to contribute to a highly motivated team, with a lot of space for your own initiatives? If yes, please apply online or send your complete application to recruiting@avawomen.com.

We appreciate that you share our excitement for Ava. Please be aware that only fully documented applications (CV, motivation letter and supporting documents) can be considered.

Ava – Revolutionizing women's health

Dejan Vukmirovic, Engineering Manager

Should you not hear back from us within 3 weeks your application has unfortunately not been successful for the respective role.
